Changes across public release versions of NIDS-CRAM Wave 2

1. V1.1.0 to V2.0.0

1.

Dataset	NIDS-CRAM
Variable/s	*w2_nc_ems_june* (and some variables thereafter in Section C of the questionnaire).
Change	Some cases needed to change from "2. No - I'm employed" to "No, I did nothing".
Reason for change	Due to a Zulu translation error.
Number of observations impacted	10
Notes	The result of following the skip patterns was that the next questions in the skip sequence needed to be changed to "-3. Missing" or system missing, where appropriate.

2.

Dataset	Derived
Variable	*w2_nc_empl_stat*
Change	10 observations changed from "3. Employed" to "-8. Refused".
Reason for change	This is a derived variable and the underlying variables changed due to a translation error in Zulu.
Number of observations impacted	10

3.

Dataset	Derived
Variable	*w2_nc_pweight_s*
Change	Added to derived data file.
Reason for change	Weights were scaled to the NIDS Wave 5 population totals and the weights algorithms were updated.
Number of observations impacted	All.

4.

Do file	Program 1b - NIDS-CRAM - Deflators_W2
Change	Changed name from "Program 1c - Deflators_NIDS-CRAM_W2".
Reason for change	Differentiating program numbers from NIDS and improving numbering across NIDS-CRAM waves.

5.

Do file	Program 2b - NIDS-CRAM - Employment_Status_W2
Change	Changed name from "W2_NIDS-CRAM_Employment_Status".
Reason for change	Differentiating program numbers from NIDS and improving numbering across NIDS-CRAM waves.

6.

Do file	Program 4 - NIDS-CRAM - Merging files for a given wave into a cross-section
Change	Changed name from "Program 2 - Merging files for a give wave into a cross-section".
Reason for change	Differentiating program numbers from NIDS and improving numbering across NIDS-CRAM waves.

7.

Do files	Program 5 - NIDS-CRAM - Merging all the NIDS-CRAM data into a panel
Change	Changed name from "Program 3 - Merging all the NIDS-CRAM data into a panel". Changed hardcoded latest wave to dynamic latest wave.
Reason for change	Differentiating program numbers from NIDS and improving numbering across NIDS-CRAM waves. The dynamic latest wave obviates the need to change the latest wave number.

8.

Do files	Program 1 - NIDS-CRAM - Deflators_NIDS_W5
	Program 3 - NIDS-CRAM - Merging NIDS and NIDS-CRAM
Change	Added.
Reason for change	Provision of same types of do files in each wave.

2. V2.0.0 to V3.0.0

1.

Dataset	NIDS-CRAM
Variable	All.
Change	Minor data cleaning.
Reason for change	Minor data quality errors being corrected.
Number of observations impacted	7051
